Projects

DropBlood (MERN Stack) [GitHub](#) — [Live App](#)
MERN Stack, JWT Authentication
Built a blood donation platform connecting donors and recipients with secure JWT-based authentication. Streamlined donation requests and management for efficient coordination.
PetPaw (MERN Stack) [GitHub](#) — [Live App](#)
MERN Stack
Developed a pet adoption platform with features for browsing pets, food, and accessories. Designed responsive UI and implemented smooth navigation with dynamic content.
Hero App (React JS) [GitHub](#) — [Live App](#)
React JS
Created a dynamic React application using reusable components, state, and props. Implemented search, filter, and responsive UI with interactive navigation.
